EDUCATION

November 2020 - November 2023

Computer Science - Aptech

Diploma

Karachi, Sindh.

PROJECTS

- Aptech Education Website & Admin Dashboard

  - Developed an advanced education management platform for Aptech Education centers.
  - Included center management tools, a resource repository, an admin dashboard with analytics, and secure user authentication.
  - Played a key role in backend development and overall project design.

- EasyForm

  - Built a dynamic form builder for creating and managing forms efficiently.
  - Focused on backend API development and frontend user interface design.

- i-team

  - Contributed to the development of the i-team project management tool.
  - Created database structures and RESTful APIs to support efficient project workflows and collaboration.

- iSchool

  - Worked on the development of iSchool, a comprehensive school management system.
  - Created robust databases and web APIs for efficient data management and real-time communication.

- Bano Qabil

  - Developed databases and APIs for the Bano Qabil Project, an online scholarship program.
  - Demonstrated ability to deliver high-quality solutions for web and mobile applications.
